Full Stack Developer currently running my product design studio in Toronto, Ontario. The combination of my education and work experience is an expression of my passion in designing better solutions that can resolve obstacles in a more creative way. I am very disciplined, **CREATIVE** thinker, problem solver, **LEAN** in building the right thing, and **AGILE** in building the things right. Looking forward to make the transition into developing stronger user experience applications with an eye for a clean code.

SKILLS

2D/3D:

Matrix 9	Rhino	AutoCad	Sketchup	Revit	Photoshop
Illustrator	Hand Sketch	3D Max	Maya		

TECHNOLOGY:

HTML	CSS	Javascript	Bootstrap	Node Js	MySQL
MERN	Git	Data Science	AJAX	JASON	REST
Command Line		Firebase	API	MongoDB	React.js
UX/UI	npm	yarn	VSC	Agile	GASP-animation

PROJECT MANAGEMENT:

WBS	Reports	Budgets	SOW	Risk Management
-----	---------	---------	-----	-----------------

APPLICATIONS BUILT

Friend Finder App

Basically a dating app. This full-stack site will take in results from your users' surveys, then compare their answers with those from other users. The app will then display the name and picture of the user with the best overall match.

I used Express to handle routing, deployed through Heroku.

Demo Link: <https://findfriendapp.herokuapp.com/>

Github link: <https://github.com/nahrinoda/FriendFinderApp>

My Portfolio

This is my website, basically it is an active portfolio that allows visitors to instantly interact with me by checking my work, skills, commenting on my projects, send me instant msgs, add to my friends list, interact with my schedule.. Created using every skill i learned so far.

Github link: <https://github.com/nahrinoda/NahrinOda>

News Scraper

This website pulls scraped news from <https://www.npr.org/sections/news/> using Node.js | Cheerio | Express | Mongoose | Request | Express-HandleBars | Body-Parser | And lot's of npm love..... You can get the latest news by clicking on the "Get New Articles" Button (Top-right). You also have the option to save your favourite article and comment on it as well.

Github link: <https://github.com/nahrinoda/news-scraper>

QUICKS

Quicks is a business oriented social network service built with MERN full stack (MongoDB, Express, React, Nodejs) Quicks allows users to create an extensive profile, include work portfolio, interact with other users and post feeds. This project is still a work in progress the main purpose behind it is in reusing the users stored data to create more helpful tools to make running and updating professional profiles easy and quick (such as: creating a CV and a business card with a click).
